

Cyber Train

The Clear Choice for Total Training Management

Cyber Train is a web-based, role orientated training management system designed to manage employee training requirements, enrollments, and certifications, easily and accurately.

Cyber Train Benefits

This simple to use tool empowers supervisors, instructors, and employees by making information regarding classes, course requirements, programs, and certifications available on a website and not just via the HR department. With no on-going monthly costs, this intuitive, highly automated tool is the perfect training solution to help ensure that your employees receive the training they need.

- Track employee and non-employee training requirements, current enrollments, certifications, and programs
- Self-service portal allows access to information and functionality by the employee, supervisor, instructor, or training manager
- Ease the tracking of training requirements with automatic notification of upcoming certification expirations to employees, supervisors, and training managers
- Allow employees to submit both educational assistance requests and external training requests and track them throughout the automated routing and approval process
- Ease of process flow with advanced automation of administrative processes and communication tools
- Curriculum creation allows setup of logical flow of required classes and programs , allowing users to track when employees are in the process of completing requirements
- Ensure employees are in compliance with job requirements through a review of certification expiration, courses due, notifications, and accreditation requirements
- Automatically add training curriculum to employee based on job title, organization level, or supervisor initiated
- Enter employee class completion and generate required certificates

Everything you need to effectively manage your training programs...

Ensure your employees receive the training they need on time, every time with Cyber Train. This in-house, role-oriented, robust self-service tool manages the entire training process and can be configured to meet client-specific training processes. Cyber Train is the system to manage all aspects of your training management.
